

Netfluentials 4 Golden Principles

In all projects in which I participate as a **netfluential** I will always...

COMMITMENT

...Contribute thoughtfully and meaningfully, and do my best to meet all the stated project requirements and expectations.

HONESTY

...Be honest in all my contributions, truthful in all personal information I give during registration and screening, and never submit anything that infringes other peoples' rights or privacy, or the law.

TRUST

...Abide by the terms of the **netfluentials confidentiality agreement**, and never reveal my log-in details or project details / content to other people, or allow anyone to contribute on my behalf.

RESPECT

...At all times treat my fellow participants and any other parties involved, materials displayed, and software applications used, with consideration and respect.
